

RENAISSANCE STAR® + EXACT PATH

A powerful partnership to
personalize learning

Individualized K-12 instruction powered by your Star Assessment® results

Are your students on a personalized path to growth? Edmentum Exact Path leverages your Renaissance Star assessment results to create individualized learning paths based on each student's strengths and needs without any further testing. Combine your existing data with our high-quality curriculum to accelerate growth goals and facilitate targeted support and intervention.

Designed to help you personalize learning by:

- Incorporating carefully crafted content specific to each student's needs—whether below, on, or above grade level
- Ensuring college and career readiness while addressing state standards and learning needs at the discrete skill level
- Using high-quality, rich multimedia curriculum committed to diversity and inclusion, created by in-house subject matter experts
- Motivating students with built-in Mastery Trophies and teacher-defined learning Challenges

1

Students experience one skill at a time to motivate learning and accelerate feedback for teachers

3

Three different learning interfaces offer intuitive navigation and functionality for K-2nd, 3rd-5th, and 6th-12th grade students

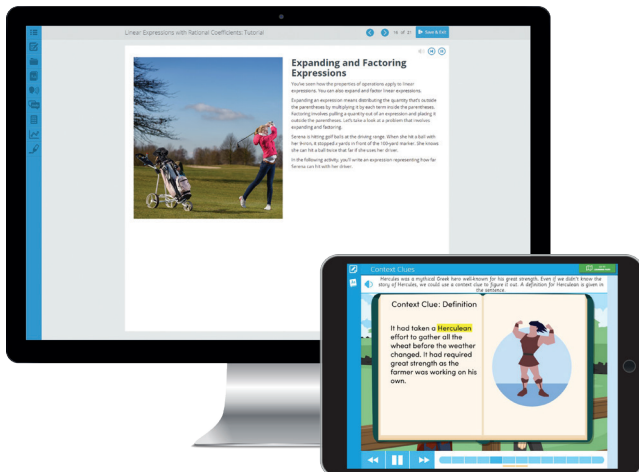

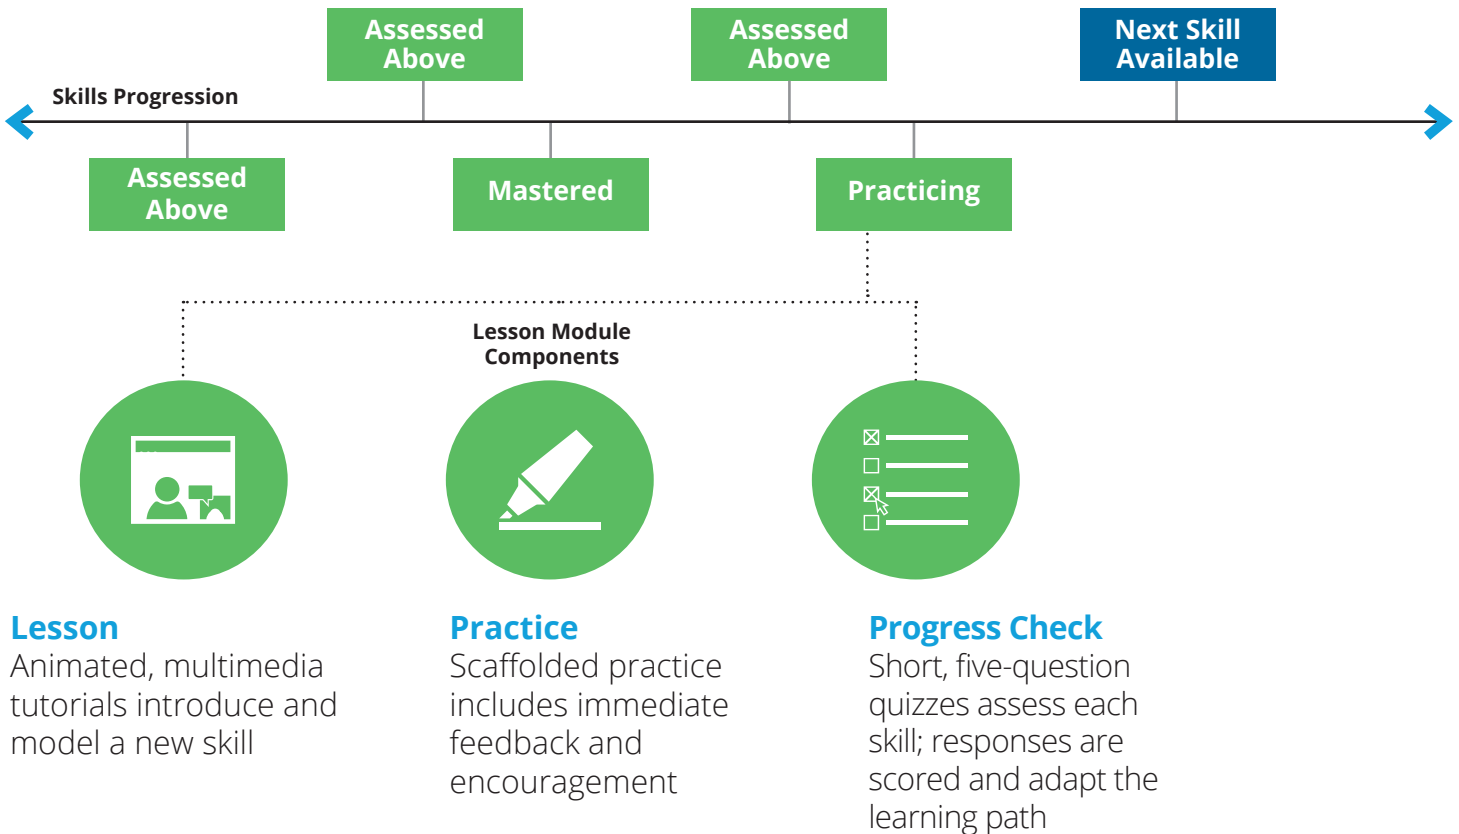

9,000

Over 9,000 different learning activities available for individualized instruction, practice, and assessment

Individualize instruction

Scaffold learning with high-quality curriculum

Using a seamless integration, Renaissance and Edmentum programs communicate with one another to automatically drive the creation of individualized learning paths in Exact Path, without manual uploads or data entry. The illustration below provides an example of how the learning path functions, and what curriculum components each lesson module might contain.

Mastery Trophies

For each skill mastered, students automatically earn Trophies to motivate learning and incentivize future success and a new skill is then introduced.

Building Blocks

If additional remediation is needed, Building Blocks automatically deploy to address gaps in learning by working on prerequisite skills.

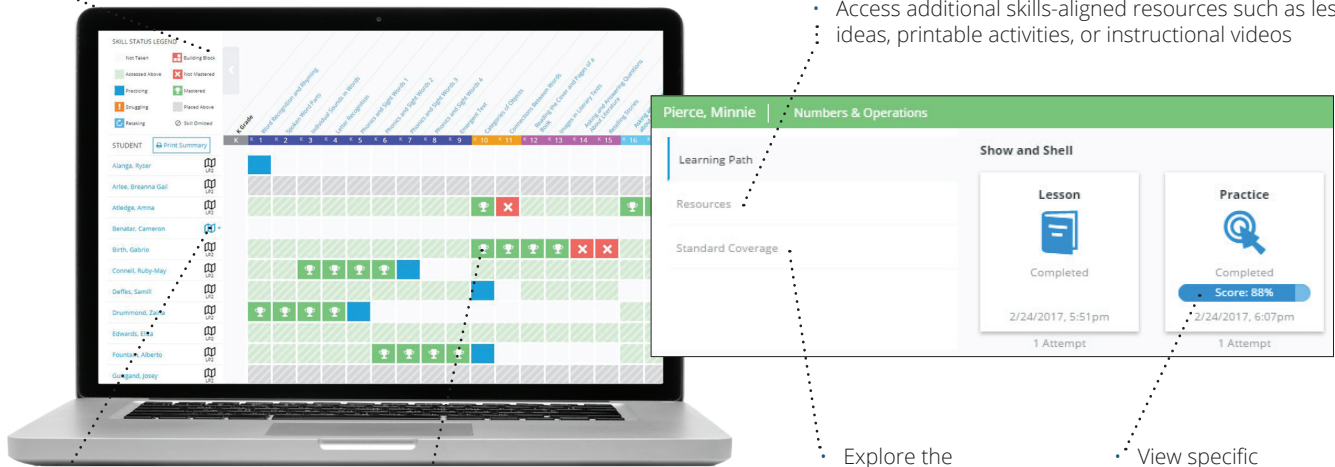

Analyze student progress

Monitor skill-by-skill performance

Dig into learning path progress to make real-time instructional decisions. The Knowledge Map provides an interactive view of each student's progress along our complete K-12 content progression.

- Access a friendly, color-coded legend anytime to help make sense of student performance

- Access additional skills-aligned resources such as lesson ideas, printable activities, or instructional videos

Auto generate a learning path for those students that may have missed the testing window

Select a skill to expand a learning menu with additional details

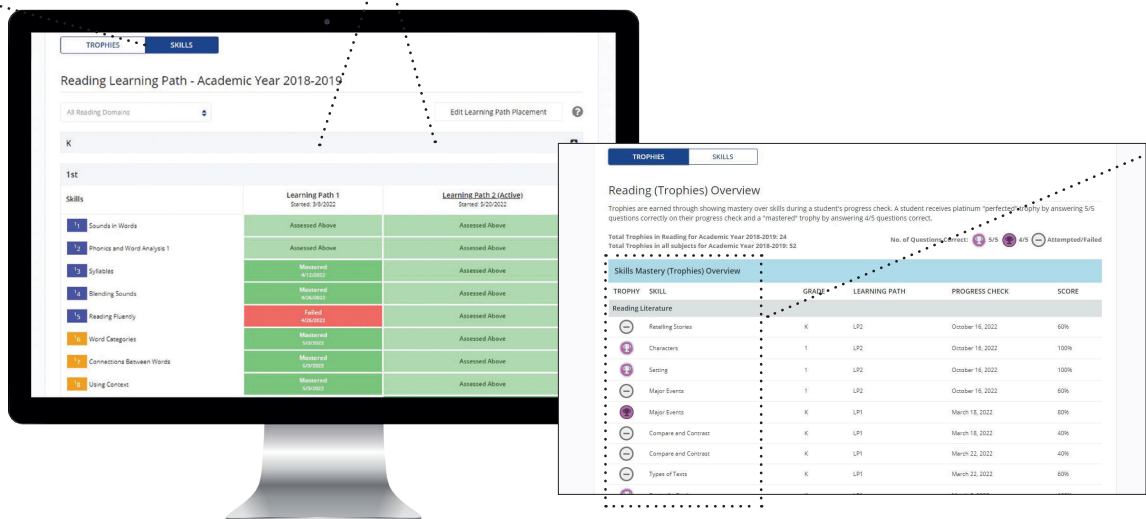

Explore the standards addressed within each content module

View specific scores and attempts for each activity

Evaluate Individual Progress

Student summary reports detail all learning path activity for a specific student to help you track progress, plan for instruction, and connect with parents and stakeholders.

- Toggle between skills and Trophies to view learning path progress and mastery
- See all learning paths and real-time progress in a simple side-by-side view

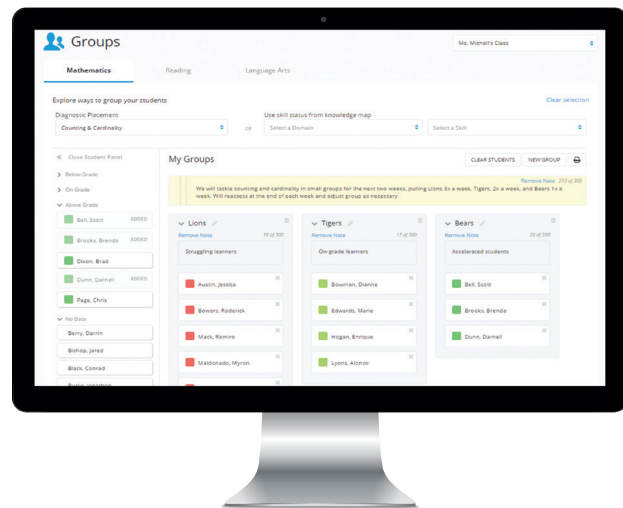

View the skills students have mastered and those in progress within each domain

Support students each step of the way

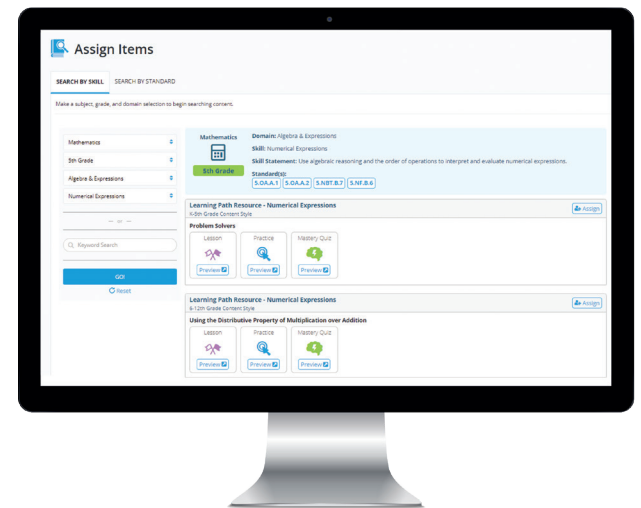

Create data-driven small groups

Crafting meaningful groups requires a lot of time. Automatically sort students into similar-ability groups based on real-time learning-path data. Then, deploy assignments for each group based on specific needs.

Build custom assignments

Gain more flexibility over what students work on at what time. Search for the standards-or skills-aligned content you want, then build your assignment to ensure students receive just-in-time instruction, remediation, and enrichment.

Answer “What’s Next” with Your Star Data

As a Renaissance Growth Alliance™ partner, Edmentum offers an integration to kick start learning by utilizing results from Star Assessments® to deliver targeted, K-12 instruction in Exact Path.

Leverage your assessment data from Star to provide students with unique instructional pathways toward academic achievement.
