Our School is Using Apex Tutorials this Year!

Apex Learning

Accelerate Learning with Apex Learning Tutorials

In our classroom, we are using an online learning program from Edmentum called Apex Learning Tutorials. This exciting digital tool individualizes learning by providing targeted remediation and immediately applying that learning to on-course instruction so your child can close gaps quickly and accelerate toward success.

Since Tutorials are web-based, your child will be able to continue their learning outside of the classroom. Access English, math, science and social studies Tutorials as well as College Readiness Tutorials to level up learning and ensure readiness this school year.

- **How can I help?**
  Consistent weekly practice will help your child grow. Encourage a structured learning schedule so your child can gain academic skills at their own pace.

- **Where can I find my child's work?**
  Your child's courses are listed on your homepage immediately upon logging in. Your child will click on a specific course to continue working.

- **Where can I monitor my child's progress?**
  On the homepage, view the "Grade to Date" and "Progress" sections next to the course name to view all work your child has completed or click on the "Activity Score Report" on the top right of the Gradebook screen.
