

Empower Multilingual Learners

Drive MLL Success with Edmentum Programs

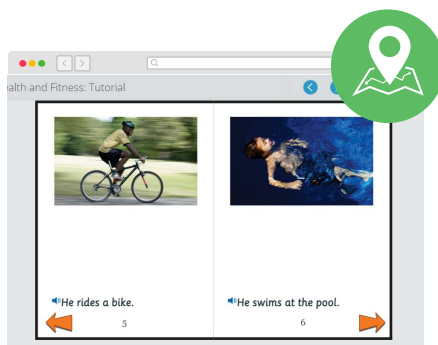

Multilingual learners (MLL), also referred to as English Language Learners (ELL), make up an estimated 4.9 million students in America's public-school system, highlighting a growing need for quality educational materials. Edmentum offers three comprehensive options—Exact Path, Courseware, and Apex Tutorials—to support English-language development and drive academic success.

Courses

Support MLLs in grades 6–Adult with interactive instructional tools within mastery-based digital curricula.

Promote English-language proficiency with two leveled English language acquisition courses.

Exact Path

Ensure academic growth for your K–12th grade MLLs with assessment-driven learning paths.

Prepare students for the general education classroom by closing skill gaps.

Tutorials

Access grade-level content for 6–12th grade MLLs with targeted remediation and built-in scaffolds.

Identify and fill knowledge gaps that align to what's being taught in class.

Exact Path has been approved through the WIDA® PRIME V2™ Correlation process following rigorous, independent reviews.

Support the Diverse Needs of Your MLLs

Multimodal learning opportunities

Practice listening, speaking, reading, and writing with engaging lessons, activities, and videos that incorporate all four language skills.

Flexible teaching and learning

Overcome the challenges of teaching in a multilevel classroom, connecting students with multiple, low pressure opportunities to demonstrate mastery and comprehension during independent, small group, or whole class learning.

Self-paced, scaffolded instruction

Support MLLs at all instructional levels by delivering scaffolded instruction following a pretest to keep students motivated and engaged as they close skill gaps at their own pace.

Real-time tracking of student success

Access actionable data through a variety of real-time reporting options to identify meaningful learning trends and support both language proficiency and academic success through data points like progress, growth, pacing, and usage.

“ [Edmentum] provides our ESOL teachers with instructional tools to address individual English Language Proficiency growth goals while providing the flexibility to extend learning for developing ELs. ”
