Build a Year-Long Assessment Strategy to Inform Instruction

AUGUST - SEPTEMBER

• Adaptive diagnostic

At this point, start with diagnosing learning needs and determining what students are ready to learn.

- Diagnose learning needs with our valid adaptive assessments or leverage your data from NWEA® MAP® or Renaissance Star®.

• Intervention

Use your assessment results to develop a strategic, tiered intervention plan.

- Create interactive and collaborative groups using our grouping tools to support tiered intervention and offer purposeful independent practice focused on specific grade-level standards.
- Check for understanding using short-cycle assessments to drive timely support and intervention.

• Personalized learning

How can you differentiate and individualize the learning experience?

- We enable educators to deliver truly personalized learning for each and every student based on their unique learning needs and individualities. We support educators with adaptive learning, real-time easy-to-use data reporting, intervention support, and assessment.

OCTOBER - NOVEMBER

• Mastery

Now, to ensure your students develop increased levels of proficiency.

- Improve mastery and retention through ongoing practice with built-in games. Instant data analysis empowers instruction and flexible competitive practice and customizable assessments ensure students gain mastery.

DECEMBER

• Learning continuity over the winter break

Students can log on, anytime, anywhere.

- Set challenges to encourage motivation and watch students earn rewards even while school is on pause.

JANUARY

• Re-assess with diagnostic assessments

Pinpoint what students have learned throughout the academic year so far.

- Help answer “what’s next?” and inform instructional next steps with key insights into data-rich analytics and reports.

• Formative Assessment

Continue your ongoing formative strategy to ensure students are retaining instruction at each step.

- Create and distribute tests built from a robust bank of standards-based questions. You can customize tests that include the

precise number of questions, technology-enhanced items, and specific subjects and grade levels you desire.

FEBRUARY

• Double-down on intervention

Time to identify any gaps and enact your instructional plan to accelerate learning.

• Assessment preparation for end-of-year assessments

Make the final days and weeks count before end-of-year tests begin!

• End-of-year summative assessments

See how students measure up against annual expectations.

• Final Diagnostic to measure growth

Assess to measure final growth gains and make the final days of instruction count.

- Engage in end-of-year student conferencing and celebrate growth from the year using detailed student summary reports as your guide.

MARCH - MAY

JUNE - JULY

• Summer school

It's common to benchmark learning needs at the start of a summer program and then reassess at the end, for example, to measure growth.

- Design a bespoke summer school learning program entirely tailored to your school's requirements to address unfinished learning and skill gaps.

Rigorous Assessments and Actionable Data

Assessments consist of formative, summative, and unit testing and are automatically marked.

Produce actionable data to help inform and tailor your teaching instruction based on areas of strength or in need of improvement.

Deliver adaptable student learning in and out of the classroom, enabling student growth driven by measurable outcomes.

Boost Standards Mastery and Proficiency

Students who use our standards-based formative assessment and practice program have been proven to improve their assessment scores.

Enable educators to make their instruction more effective by offering high-quality, flexible formative assessment tools to quickly measure who is on track and who needs additional support.

Build your own customizable tests and set up fun and collaborative group sessions wherever learning takes place.

Personalized Learning for Academic Growth

Research confirms that students who use Exact Path's diagnostic assessment and direct instruction can close learning gaps and demonstrate significant growth.

Assign diagnostic assessments and individualized direct instruction for all students to help close gaps and propel learning.

Adaptable learning paths allow any struggle to be remediated swiftly, enabling educators to analyze data and drive targeted tiered instruction.
