

Study Island

Standards Mastery at Home

Encourage your child to use Study Island from home to continue driving grade-level proficiency.

In our classroom, we are using a standards-based, formative assessment program, Study Island, as an online learning resource to boost students' grade-level proficiency. Since Study Island is web-based, students will be able to continue their learning outside of the classroom, anywhere Internet is available!

- **How can I help my child improve?**

Just 30 minutes of consistent practice per subject per week can help your child grow. Encourage them to take additional opportunities outside of the classroom to practice their skills in Study Island.

- **Where can I find my child's work?**

On the homepage, you'll find your child's assignments located in the "Active Assignments" section in the bottom right quadrant on the screen. You can also navigate to the "Topic Tree" using the left navigation bar. There you'll find all topics available for a given subject. Once your child has mastered a topic, they will earn a Blue Ribbon!

- **Where can I monitor my child's progress?**

Navigate to the section titled "My Reports" to find progress monitoring of your child's mastery skills in each individual subject, as well as their overall usage in Study Island. You'll also be able to compare your child's progress to other individuals in the state, as well as track which topics they need additional help, how many Blue Ribbons have been earned, and high scores achieved during game mode.
