

Study Island

Prepare Your Child for High-Stakes Testing at Home

Continue mastering essential standards at home with Study Island

In our classroom, we will be using an online learning program from Edmentum called Study Island to help ensure standards mastery, and in the process, also prepare students for summative exams this year. In addition, Study Island is web-based, so students will be able to continue their learning outside of the classroom as well, anywhere that internet is accessible.

- **How can I help my child improve?**

Just 30 minutes of consistent practice per subject a week can help your child grow and master standards. Additionally, retrieval practice (like what's available in Study Island) is one of the best research-based ways to make learning stick!

- **Where can I find my child's work?**

From your child's homepage, you have access to both In Progress Topics and Active Assignments. Both of these areas are key places to start working. As your child demonstrates success, an ongoing tally of Blue Ribbons (which represent topic mastery) is displayed. Finally, Suggested Topics elevates specific topics where your child may need more intentional practice.

- **Where can I monitor my child's progress?**

From your child's homepage, choose My Reports from the left navigation. Choose from the different options to track usage, progress, Blue Ribbons, or priority areas for improvement.

How to login:

- Visit the Study Island login page, found at <https://app.studyisland.com/cfw/login/>.
- Enter your student's login details.
