

I am writing the number 695 in expanded form using number magnets. I think I made a mistake. **How can I fix it?**

$$600 + 50 + 9$$

$$\begin{array}{ccc} 900 & 60 & 5 \\ 6 & 500 & 90 \end{array}$$

I needed to switch the **50** for a **5**
and the **9** for a **90**.

$$600 + 90 + 5$$

**What other numbers
could I write in the
expanded form using
these magnets?**
